## Thinking about playing a sport in 2021-2022?

### IMPORTANT INFO BELOW!

Dear Parent/Guardian:

In 2017 Horry County Schools implemented a new electronic registration system for athletics. Parents and students are required to create an online account and complete the pre-participation physical packet online. The online packet must be completed before any participation in athletic activities will be allowed. To complete this process, please follow the instructions outlined below.

If you have already completed a parent and student account previously on **PlanetHS** or **ArbiterAthlete**, then simply log in using your same account username and password and complete the required information for 2021-2022. **If you do not remember your account information, please contact the athletic department at your child's school.**

**DO NOT CREATE A SECOND ACCOUNT IF YOU HAVE FORGOTTEN YOUR PASSWORD.**

Visit [www.PlanetHS.com](http://www.PlanetHS.com) and click "sign up" or "log in". You may also text a school code (see below) to **69274** to sign up. **Do not create an account or sign any forms before April 1, 2021.**

**BOTH** parents and student need to make separate accounts and then **LINK** the two accounts. See below for instructions on how to link parent and student accounts and complete the physical forms online.

### Athlete/Parent Account Registration and Pre-Participation Form Completion

1. Go to [www.PlanetHS.com](http://www.PlanetHS.com) and click "sign up".
2. Parent **AND** Student will need to make separate accounts
  - A. Students, please enter your **legal** first, middle and last name
  - B. **Students, it is recommended that you use your HCS email and password.**  
Ex. [jsmith@g.horrycountyschools.net](mailto:jsmith@g.horrycountyschools.net)
  - C. Please chose the high school at which the student will be participating. You may add a middle school later.
3. Once logged in to either parent or student account:
  - A. Complete Emergency Information
  - B. Click Athletic Forms
  - C. Click Athletic Participation
  - D. Scroll down and click "**Link Accounts**" and enter the email address or phone number of the parent/student who needs to be linked.
4. The other person will receive an email/text to confirm linking accounts. They will see the invite and click "**Approve**".
5. Once the accounts are linked, you will follow steps B and C again and then scroll all the way to the bottom.
6. **Click on each of the forms and complete them appropriately.**
7. **PHYSICAL EXAM** form and **BIRTH CERTIFICATE** will need to be uploaded as a document or a clear picture (make sure it is the page of the physical with doctor's signature, we don't need the other pages).
8. **Both the Parent and Student** will have to click on the links to each form from their separate accounts because both signatures will be required before it will be approved.

**If you have any questions, you may contact the Athletic Director or Athletic Trainer for the school at which you will be participating.**

# INFORMATION CONCERNING PARTICIPATION IN SPORTS

## 2021 -2022

By its very nature, competitive athletics puts students in situations in which **serious, catastrophic, and sometimes fatal accidents and illnesses** may occur. Many forms of athletic competition and practice result in violent physical contact. The use of athletic equipment may result in accidents, injury, or death. Strenuous physical exertion and numerous other exposures to the risk of injury occur while participating in interscholastic athletics.

A student and his/her parents must assess the risks involved in participation in competitive athletics and make a decision concerning whether or not the student participates in spite of the risks. No amount of instruction, precaution, or supervision will totally eliminate the risk of death, injury, or illness associated with participation in athletic activities. Just as driving an automobile involves risks, athletic participation by middle or senior high school students also may be inherently dangerous. The responsibility that parents and students have in making a choice to participate cannot be overstated. There have been accidents resulting in death, paraplegia, quadriplegia, and other very serious permanent physical impairments as a result of athletic competition and/or practice. By granting permission for your child to participate in athletic competition and practice, you are acknowledging that you fully understand that such risks exist.

Students will be instructed in the proper techniques to be used in athletic competition and practice and in the proper utilization of equipment worn or used in practices and competitions. Students must always adhere to that instruction and utilization and must refrain from improper use or techniques.

Sudden Cardiac Arrest (SCA) is a potentially fatal condition in which the heart suddenly stops beating. When this happens, blood stops flowing to the brain and other vital organs. One possible cause of SCA is a sudden blunt non-penetrating blow to the chest and the use of recreational or performance-enhancing drugs and/or energy drinks. SCA is the #1 cause of death in student athletes.

Heat cramps, heat exhaustion, and heat stroke are the result of either extreme fluid loss over a period of a few hours or continued fluid loss over a period of several days. Any athlete, in any sport, outdoor or indoor can suffer from heat related illnesses. If heat stroke is suspected, the body must be immersed fully in ice-cold water immediately to help reduce the core body temperature. This can be a life-threatening condition if not treated in a timely and efficient manner.

Disordered eating can lead to adverse effects on health and physical performance. Other consequences upon health and performance depend on the athlete's immediate health status; the demands of sport-specific training; type, severity, and duration of the pathogenic weight control or eating behaviors; the degree of nutrient deficiency; presence of comorbid physical and mental disorders; and the timing and quality of therapeutic interventions. All athletes are encouraged to maintain adequate nutrition habits both in and out of season.

As previously stated, no amount of instruction, precaution, and supervision will eliminate the risk of serious, catastrophic, and fatal injury or illness.

### ADDITIONAL INFORMATION CONCERNING PARTICIPATION IN FOOTBALL

Football is a collision sport and injuries can, and do, occur. Safety is the major concern of the Rules Committees of the National Federation of State High School Associations, and recent rule changes have reduced the number of serious injuries. This document does not cover all potential injury possibilities in playing football, but it is an attempt to make players and their parents aware that fundamentals and proper-fitting equipment are important to student safety and enjoyment in playing football.

By rule, the helmet is **not** to be used as a "ram." Initial contact is not to be made with the helmet. However, it is not possible to play the game safely or correctly without making contact with the helmet when properly blocking and tackling an opponent. Therefore, technique is most important to prevention of injuries.

Tackling and blocking techniques are basically the same. The play should always be in a position of balance: knees bent, back straight, body slightly bent forward, head up, target area as near to the body as possible with the main contact being made with the shoulder.

Blocking and tackling by not putting the helmet as close to the body as possible could result in shoulder injury such as a separation or pinched nerve in the neck area. The dangers of not following the safety rules in making contact with the upper body and helmet is that improper body alignment can put the spinal column in a vulnerable position for injury.

If the head is bent downward, the cervical (neck) vertebrae are in a straight line and contact on the top of the helmet could result in a dislocation, nerve damage, paralysis, or even death. If the back is not straight, the thoracic (mid-back) and lumbar (low back) vertebrae are also vulnerable to injury with similar results.

If the knees are not bent, the chance of knee injury is greatly increased. Fundamentally, a player should be in the proper hitting position at all times during live ball play. The injury could be anything such as, but not limited to, strained muscles, ankle injuries, or serious knee injuries requiring surgical care. Blocking below the waist is permitted only in a defined area known as the "free-blocking zone" and only under the conditions specified by the football rules. Cleats have been restricted in length to further help in preventing knee injuries. A runner with the ball, however, may be tackled around the legs.

In tackling, the rules prohibit initial contact with the helmet or grabbing the face mask or edge of the helmet. Serious injuries may result from non-compliance. Initial helmet contact could result in a bruise, dislocation, fracture, head injury, or internal injury to organs such as, but not limited to, kidneys, spleen, bladder, etc. Grabbing the face mask or helmet edge could cause a serious neck injury resulting in, but not limited to, muscle strain, dislocation, fracture, nerve injury, spinal damage, paralysis, or death.

If any of the foregoing is not completely understood, please contact the school's Athletic Director or Athletic Trainer for further information and clarification.
