

All Students will complete at least four units of math.

CFHS recommends that all students who plan to attend a four year College or University take a math course each year of high school. These students must include Algebra 2 and one math course beyond Algebra 2.

The above pathways are reflective of typical students. Based on grades and teacher recommendation, students may move between tiers (i.e. into Honors or AP).

+ Students who earn less than a "B" in Algebra 2 Honors should take Algebra 3 prior to Pre-Calculus Honors.

\* Denotes a yearlong course (2 credits).
