

BOOSTER CLUB FOR TECHNOLOGY

BOOSTER CLUB FOR TECHNOLOGY

The window is open for students to join the “Booster Club for Technology.” Students have the opportunity to enter in the computer lab and work on extra assignments, use tutorial software in order to increase performance on assessments, academic subjects, exploratory subjects, and learn how to master computer applications essential for related personal and business activities. The club is a “gift” to students who are open to learn “soft” skills needed to be successful in any career. All students are highly welcome to join the club.
